## Education

---

### IIIT GUWAHATI

Bachelor of Technology in Computer Science and Engineering

Aug 2023 - May 2027

📍 GUWAHATI, ASSAM

### KENDRIYA VIDYALAYA 1STC JABALPUR SCHOOLING (1-12th)

Aug 2011 - May 2023

📍 JABALPUR, MP

## Experience

---

### Buildspace

june 2023 - june 2023

Intern – Remote

📍 San francisco, USA

- **DSA:** Data Structures and algorithm
- **Tech Stack Mastery:** Utilized the MERN stack, seamlessly integrating the React.js frontend with an Express.js backend, and managed data with MongoDB Atlas.
- **UI/UX Enhancements:** Improved user experience by integrating Material UI for design and GSAP for animations, creating an intuitive and dynamic interface.
- **End-to-End Project Development:** Gained comprehensive experience from planning and requirement analysis to deployment, applying real-world project development practices.

## Projects

---

### Locksync (access sharing platform)-working on

([Github](#))

- **Ultimate File Syncing and Sharing Solution:** Securely sync and share your accounts without revealing passwords.
- **User-Friendly Interface:** Easily register, log in, and manage shared accounts with intuitive UI components.
- **Technologies used:** React, Express, tailwind, MongoDB Atlas, Material UI, and GSAP for animations.

### Spotify Clone -live

([Github](#))

- **Spotify-like Music Streaming:** Replicates key Spotify features including browsing, searching, and playing music.
- **Media Controls:** Implements play, pause, and volume control features for seamless music interaction.
- **Technologies used:** HTML, CSS, JavaScript, and Web Hosting services.

### NextJS Full Stack App(review-app)

([Github](#))

- Custom Auth System: Implements JWT tokens, sessions, and AuthJS for secure user authentication.
- User Signup & OTP Verification: Allows user registration with OTP verification and custom username check.
- AI Integration: Integrates AI features into the project for enhanced functionality.
- Database Integration: Connects and interacts with a database to manage user data.
- Email Setup: Sends automated emails using Resend service.
- Technologies used: NextJS, Typescript, ZOD for validation, React Hook Form, ShadCN, MongoDB, AI APIs, JWT tokens, and email services(resend), tailwind(css).

## Skills

---

- **Languages:** C, C++, Python, JavaScript, HTML, CSS.
- **Frameworks/Libraries:** NextJS, React, Express, Node, TailWind CSS, ZOD.
- **Tools:** Git, GitHub, MongoDB (Atlas).
